ANTIOCH, ILLINOIS, THURSDAY, MARCH 10, 1927.

No. 28

ARTIFICIAL RESPIRATION KEEPS MAN ALIVE 4 DAYS

Public Service Co. Employee Work-
Shifts to Save Life of Alfred Frick.

Holding in their hands the slender life thread of a comrade, Evanson and Park Ridge employees of the Public Service Company of Northern Illinois have succeeded—with their hands—in preserving the delicate strands of that thread for nearly 100 hours.

Since 11 o'clock Sunday morning, Alfred Frick, 22-year-old salesman in the Public Service store at Park Ridge, has been kept alive by artificial respiration. Fellow-employees, organized in shifts and working pairs have been constantly at his bedside since that hour. Trained diligently by their company in the skillful application of First Aid measures, including artificial respiration, these Public Service men—more than a score of them—have been mobilized at the St. Francis hospital in Evanston, waiting and working, working and waiting—each man eager for his shift at the bedside, literally to breathe for Alfred Frick.

Following a sudden illness, characterized by severe cramps in the stomach, young Frick was taken to the hospital last Saturday afternoon. Saturday evening progressive paralysis set in, travelling rapidly through the patient's lower limbs and upward toward the brain. Sunday morning the malady was diagnosed as the dread Landry's paralysis. At 10 o'clock it was evident to three physicians in attendance that Frick's diaphragm was becoming paralyzed. A short time later, natural respiration ceased; the young man was dying.

Instantly the doctors started application of artificial respiration and dispatched a call for assistance in this work to John S. Reesman, Public Service Company district manager at Evanston. By 11 o'clock the first volunteers had arrived, summoned by Mr. Reesman to meet the emergency. By 12 o'clock, organization of relief crews had been perfected. They were assigned to work in pairs, 15 minutes at a stretch.

Carefully, soberly, skillfully, they went at this job of breathing for Alfred Frick, mindful only of the fact that in their hands rested his life. All through the afternoon, evening, and long hours of the night they worked, each successive relief approaching the bedside in time to continue the forced respiration without the loss of a single stroke. Up, down, up, down, in tireless, never-ending cadence; compressing and releasing the paralyzed diaphragm in young Frick's stricken body—performing the life-preserving function of breathing for their friend and fellow-employee.

Wednesday morning, after 72 hours of artificial respiration, the first encouraging message came from the bedside—that the young man had almost completely recovered consciousness, was able to talk coherently and to sip a few sallows of milk from a glass. He seemed further strengthened by eight hours of sleep Tuesday night—the first he has had since Sunday. He also reported feeling warmth in his feet and legs—paralyzed since Saturday night.

Physicians are hopeful that these improvements presage the departure of the paralysis from the diaphragm, permitting the resumption of normal breathing.

Meanwhile, Frick's fellow-employees are ceaseless in their vigil—untiring in the labor which is preserving his thread of life.

Today Alfred Frick is still conscious and fighting for life after more than ninety hours of artificial respiration administered by the 56-man crew working in shifts. Last night he was able to take broth and egg-nog through tube. Doctors in attendance say it is impossible to predict outcome, but state that the patient's condition in general is somewhat better today.

Ted Poulos is back at his old post at the Antioch Cafe after an absence of several months during which time he has been employed in Chicago.

Fox Lake Players to Present "Safety First"

Home Talent Play to Be Staged at
Methodist Church Tuesday Night.

The popular three act farce comedy, "Safety First," will be presented at the Antioch Methodist church next Tuesday night by a company of Fox Lake players, all home talent. The play has been presented with great success at Fox Lake and the actors have been asked to repeat the play at that place, as the large crowd could not be accommodated at the Illinois Hotel at the first performance.

Proceed of the play here Tuesday night will go to the redecorating and furnace fund.

Admission prices will be 50 cents for adults, and 25 cents for children under 12.

MANY ON HONOR ROLL AT HIGH SCHOOL

The high school students who have ninety or above in two or more subjects and are thus on the Honor Roll this last six week period are as follows:

Glenna Roberts 6 1-2 credits
Louis Forbrick 5 1-2 credits
Marion Willie 5 credits

Those having four credits above ninety are:

Lena Selona, Martha Westlake, Louise Simons, Mary Herman, Harold Kennedy.

Those having three above are:
Clara Micheli, Homer Tiffany, Laura Anderson, Joe Bernoloff, Homer Edwards, Gordon Martin, Lena Nelson, Evelyn Norris, Dorothy Hughes, Mary Anderson.

Those having two above are:
Anna Simonsen, Ruth Hanke, Irma Hanke, Emil Halwas, S. Pacini, Virginia Bachmeister, Leona Hennings, Roy McNeil, Margaret Kufolk, Harriet Snyder, Amelia Bernoloff, Lillian Hawkins.

Students to Compete at Elgin.

The Antioch high school is venturing into new competitive activities next week when they go to Elgin, March 18, to enter the district state meet in music and public speaking. It is not expected that they will win all the first places, but it is expected that they will make a good showing and gain experience in this work, as well as have a good time.

There will be about forty-five boys and girls making the trip by bus and car.

The music events entered will be: Orchestra, Boys' Glee Club, Girls' Glee Club, Combined Chorus, Soprano Solo, Contralto Solo, Baritone Solo.

Miss Bauck and Mr. Stark direct the music.

The Public Speaking events will be:

Oration, Declamation, Extemporaneous speaking.

Schools are classified according to size: Class A have over 500 students, Class B 150-500, and Class C fewer than 150.

Antioch will be in Class C if there are other schools entered of this size, otherwise they will compete in Class B.

This is necessarily a rather expensive trip, and it is proposed to defray a part of the expenses by a public performance next Tuesday, March 15, by charging 25c admission. It is hoped that this form of activity will receive as good support from the people of the vicinity as have the athletic teams.

The winners in the various events at Elgin district meet will go to DeKalb in a sectional meet, and the winners in a sectional meet, and the winners at DeKalb go to Bloomington for the finals.

BUSINESS CLUB MEETS NEXT MONDAY NIGHT

The Antioch Business Club will meet Monday night, at which time a special film will be shown by the American Telephone and Telegraph company. The place of meeting will be announced by card.

MILK ASSOCIATIONS MERGER PLAN FAILS

Once again the merging of the Milk Producers Association and the Pure Milk Producers Association has failed.

The conditions laid down by the Pure Milk Association made it impossible for the Milk Producers Association to consent to a consolidation of two organizations.

The facts in the case are the Pure Milk Association representatives, Mr. McQueen, Mr. Carmac and Mr. Geyer, refused to consider the thought of the word "merger" or "consolidation" on the ground that a merging carried with it the condition that both organizations, must in such an agreement surrender or lose their identity and come out under a new order, name, etc.

Mr. McQueen stated that whatever is done the "principles of the Pure Milk Producers Association shall be the governing principle of the future organization in the main."

It was also stated by Mr. McQueen that the conditions under which members of the new or merged organization may be taken "must be that only men who own tested herds can or will be accepted as members."

With these conditions to contend with the Executive Committee of the Milk Producers Association were unanimously of the opinion that they could not carry out the injunction of the Board of Directors "That a Committee of Five be appointed to consider and agree upon a set of recommendations to offer the Board of Directors or their approval." This Executive committee is: Frank T. Holt; W. H. Kruffus; John Fisher; W. D. Dumloug; H. C. Benhart and W. J. Kittle.

Great Opportunity For P. T. A. Says Speaker

Mrs. Edmonds, Regional Director,
Tells of Work Done by Parent-
Teacher Body.

The great opportunity of parent-teacher organizations to assist in educational work in our public schools was the theme very ably discussed by Mrs. J. E. Edmonds of the Illinois council of Parent-Teacher associations, at the meeting of the local organization at the Antioch public school last Monday evening. Next to a wise selection of the teaching corps, the co-operation of parents and teachers is the greatest single factor in assisting the pupils along the paths of knowledge, according to Mrs. Edmonds, whose remarks were very well received by the large audience present.

Cost of Education Is High.

To those who have not yet ascertained the facts, the cost of operating Illinois public schools is astounding, as almost one hundred dollars is expended each year for each and every child attending the public schools of the state. Such a cost should mean efficiency, and all parents hope to see their children well along the paths of attainment at the close of each school year. A well ordered and active parent-teacher association will help any community to get value received from the schools, which are supported by society at large, as are parks, libraries and playgrounds, and not by assessments against the users only. A man with one child in school pays as much tax as the man with five or six children. The man who is unfortunate enough to require the services of a fire department is not benefited for the expenses incurred in his behalf. In fact, his next door neighbor whose house has been saved from fire is actually the greatest beneficiary. The cost is paid by society at large. If school children in Illinois had been forced to pay a tax on use for the school year 1924-1925, each child would have been charged \$90.91.

Contests Feature Meeting.

Those attending the meeting Monday night had the opportunity of observing work of pupils as it is done in school. In the dictionary contest Ruth Nixon proved to be most proficient in the use of Webster, and Betty Warriner was winner in the spelling bee.

TOURNAMENT STARTS TODAY AT WAUKEGAN

Antioch Team to Play Friday After-
noon at Four O'clock.

The district tournament to determine the basketball championship of this section of the state will be held in the Waukegan Township High School gymnasium on March 10, 11, 12. The following schools are entered: Antioch, Arlington Heights, Deerfield Shields, Des Plaines, Evanston, Gurnee, Libertyville, New Trier, Palatine, Wauconda and Waukegan.

Antioch Plays Friday

Antioch will play the winner of the Palatine-Libertyville game Friday afternoon at four o'clock.

Palatine will probably win their first game altho Libertyville is playing a far better game than they did earlier in the season.

If Antioch is successful in their first game they will play again Saturday afternoon at two o'clock with Deerfield as probable opponents.

The Waukegan Township High School gymnasium, in which this tournament is to be held is one of the finest gymnasiums in the Middle West. The playing floor measures seventy by one hundred and twenty feet, and the basketball court is ninety-four by fifty feet.

Fine Playing Floor.

The playing surface is made of yellow pine paving blocks laid as a floating floor directly on the structural slabs without fastening of any kind. This floor has proven very popular in the east because it deadens the sound, wears like iron, and takes and retains a polish easily. This is the first gymnasium floor of its kind to be laid west of Pittsburg. Many of the amateur and professional players who have played on this floor this season pronounce it the best court they had ever seen or played on.

The playing court is splendidly lighted either by day or night. There are approximately six thousand square feet of window space. With the possible exception of the university of Illinois, the lighting is by far the best we have ever seen in any gymnasium. Thirty lamps, of three hundred watts each, light the floor at night and thirty more, two hundred watt lamps, are above the bleachers.

The bleachers, which will seat two thousand people comfortably, are approached by two broad stairways opening off the front corridor. The stairways are twenty feet wide so one can easily see that there is no little congestion of traffic. There are also the fire exits which can be used to facilitate the handling of the crowds if necessary.

The Waukegan Township High School Athletic Association wants everyone to enjoy himself thoroughly during the tournament and will do all they can to make your visit a pleasant one. There will be maintained, during the entire tournament, in the main corridor, an information desk where you can obtain hotel rates, cafe menus and rates, train and car schedules and any information which you may desire.

Also the association is maintaining a telephone operator who will be able to give you the scores and the progress of the game at any time. Simply call Waukegan 5160 and you will get the very latest report on the game.

FARMERS' INSTITUTE TO WAUKEGAN NEXT YEAR

The Illinois State Farmers' Institute is to meet at Waukegan next year. This year the institute was held at Kankakee. For five years the Lake County Farm Bureau has been working to bring the Institute to this county, and recently, through the combined efforts of the Waukegan Chamber of Commerce, Lake county farm bureau and representatives of the state legislature the vote of the directors of the state organization was obtained last week.

J. E. Barrett, of Prairie View, is the director from this district, and it is through his untiring efforts, with the help of the other organizations that Waukegan and Lake county are to be the hosts next year.

Milk Marketing Expert to Speak Monday Night

A. D. Lynch of the Co-operative Marketing Department of The Illinois Agricultural Association to speak here on Marketing Milk.

Next Monday evening at 8:00 Mr. Lynch will speak at the Antioch High School Auditorium on the subject of marketing milk and milk products. All products of milk in this community, especially those who are interested in finding a better market are invited to attend this meeting and hear Mr. Lynch. He has been one of the men who helped organize the Peoria Co-operative Milk Co., of Peoria, Illinois, that is making such a wonderful showing and proving successful to the farmers around peoria.

Several reels of motion pictures will also be shown. All milk producers and others interested are invited to come and bring their families and friends.

Lake County T. B. Testing Is Slowing Up

Eight Vets. Test Nearly 4000 Cattle
Last Week—Only Four Men
Working This Week.

It will be impossible to have all the herds delivering milk to Chicago tested by this week end. As there are only 4 veterinarians working this week, the state having called out all of their men. Last week 8 men worked in the county and tested 3865 cattle. The week before 5 men tested 2779. This week with 4 men working there will be somewhere around 2300 tested, the way the men are working now. It is hoped that the state will send in extra help next week.

The present force consists of Dr. D. C. Grinnell, county veterinarian who has charge of the work in the county, Dr. C. C. Haworth and Dr. O. T. Hayer, associate county veterinarians hired by the County Board of Supervisors to work until May 1, and Dr. A. Lee, a federal veterinarian, who has been placed in the county to assist with the work until April 1.

Since February 14, when this emergency came up and the end of this week the state will have had men working in here for 38 days, the Federal Government has had a man in here for 14 days and the extra help put in by the county totals 36 days and Dr. Grinnell has put in 24 days, making a total of weeks.

In the past 3 weeks 7756 cattle were tested, with probability of having 2300 tested this week will put the number up well over 10,000 head.

Considerable progress has been made in the eradication of T. B. When help was put in March 1926 17% of these same herds were tested with a total of 4122 cattle. Of these 2208 were reactors or 53.5 per cent. During the last 2 weeks 308 herds were tested with 6644 cattle, of these 457 were reactors or 69 per cent.

A greater percentage of the herds tested are coming through clean than in any previous test. A very noticeable improvement has been brought out in that practically all of the herds which have come through clean are herds which have paid special attention to the cleaning the premises after the reactors have been taken out. It is impossible to carry on a systematic eradication of T. B. when sanitary measures are not adhered to.

Mrs. Minnie Pries Dies at Petite Lake Home

Mrs. Minnie Pries, beloved wife of Henry J. Pries, died at her home at Petite Lake, Wednesday, March 9. Her sudden death followed an illness of only three days.

Mr. and Mrs. Pries moved from Chicago about twelve years ago to Petite Lake which has since been the family home. The couple were married June 7, 1909. She leaves to mourn besides the husband, three sisters and one brother, also a host of friends.

Deceased was a member of Antioch Chapter O. E. S. and the funeral will be conducted by that order at her late home at Petite Lake on Saturday, March 12, at 9:30 a. m. Burial will be in Waldheim cemetery, Chicago.

ANTIOCH, PALATINE TIED FOR CHAMPIONSHIP

Locals Win from Old Rivals in
Final Game.

By defeating Warren last Saturday night 25 to 23 Antioch goes in to a tie with Palatine for first place each team winning 10 games and losing 2 in the conference race.

The score indicates just how hard fought this game was from start to finish. Warren was out to win this game as a win for them would give them second place and put Antioch in third place, but they were doomed to take third place.

The game opened with Warren getting the first basket and very shortly getting another to give them a 4 to 0 lead. Antioch called time out to talk things over and after this they got started and soon had the score tied. The score was tied most of the time during the first half with one team getting a basket and then the other. Just before the half ended Antioch secured a 14 to 13 lead. Both teams came back strong but Antioch was playing a better game than they did in the first half and had a safe margin of 23 to 18 with about 2 minutes to play. Gee got his long basket of the game to make it 23 to 20 and then Gillings was fouled while in the act of making a basket to give Warren the 2 points on the basket and two free throws. Warren took time out to get their wind and then Gillings made good on his first free throw to tie the game at 23 all. He failed on his second throw and there was just one minute left to play with the score tied 23 to 23. Antioch took the ball down the floor and Schwenk went in under the basket too fast to make his shot count, but Nixon was following the shot and he took the rebound and put thru an easy one handed shot to give Antioch a 25 to 23 lead just as the game ended.

Gillings and Dixon were high scorers for Warren with five and three baskets to their credit. Schwenk and Spicer each collected four baskets and Nixon's two came thru just at the right time.

Antioch won this game on free throws as they made good five out of five chances while Warren made three out of eight tries.

Final Conference Standing:

	Won	Lost	Pct.
Antioch	10	2	.833
Palatine	10	2	.833
Warren	10	4	.714
A. Heights	8	6	.571
Barrington	6	8	.429
Libertyville	4	8	.333
Leyden	2	10	.166
Wauconda	2	12	.143

Dr. Jensen Addresses Local Dairymen

Last Monday evening, Dr. Jensen, local veterinarian, spoke to the patrons of the Evening Dairy School, conducted under the auspices of the Agricultural Department of the local High School. Dr. Jensen's subject "Sanitation On the Dairy Farm," was well presented and the dairymen present all expressed their appreciation of the part that Dr. Jensen has taken in making the Evening School a great success. One more session will wind up the course next Monday when Prof. Lynch will talk on Co-operative Marketing of milk and milk products.

Dr. Jensen said that sanitation consists in having (1) good drainage; (2) ventilation; (3) light (especially direct sunshine); and (4) a good clean water supply. He dwelled on each of these at length and told their connection to such cattle diseases as are now prevalent in this country.

YAGER, KELLER, TAYLOR, HIGH MEN IN WAUKEGAN PRIMARY

Mayor L. J. Yager and Ralph Johnson will fight it out for the chief executive post of the city of Waukegan at the election April 19, these two having been high men at Tuesday's primary election. Nearly 8000 votes were polled.

For police magistrate Walter A. Taylor and M. J. Hancy were winners with 3677 and 1583 votes respectively.

THE LEADING LADY

by **GERALDINE BONNER**

Copyright by The Bobbs-Merrill Co.

PROLOGUE—While dependent over the enforced hiding of her name, Jim Dallas, slayer in self defense of Homer Parkinson, member of an influential family, Sybil Saunders, popular actress, is engaged to play Viola in a charity performance of "Twelfth Night" on the island in the Maine coast. In the company are Sybil's bosom friend, Anne Tracy, Anne's brother Joe, young wasterel, and Aleck Stokes, an actor infatuated with Sybil.

CHAPTER I—After the play, which is a big hit, Wally Shide, official photographer, learns something of the jealousy existing in the company.

CHAPTER II—Hugh Bassett, director of the play, and Anne Tracy's fiance, tells Joe he has heard he is spying on Sybil in an effort to learn the whereabouts of Jim Dallas and earn the reward offered by the Parkinson family. The boy denies it.

CHAPTER III—Joe Tracy is arranging for a vacation trip. To Anne he tells his family toward Sybil Stokes, and to secure privacy they arrange to meet in a small summer house.

CHAPTER IV—The sound of a pistol shot awakes the assembled company. Investigation shows a revolver has been taken from a desk in the library. Flora Stokes, wife, bursts in with the announcement that Sybil has been shot and her body carried off by the tide.

CHAPTER V—Flora Stokes tells Bassett she saw Sybil shot but did not see her murderer. Bassett notifies the sheriff, Abel Williams. He arrives with Bassett, district attorney, and a man called Patrick. All the company is accounted for, with the exception of Joe Tracy, presumably on his trip. Flora gives her evidence, and the authorities arrange so that no one can leave the island.

They rise wearily and prepared to go. Stokes helped his wife to her feet and Bassett walked between the chairs toward Anne.

"How are you?" he murmured, for her appearance shocked him.

"All right. There's nothing the matter with me."

"Try to get some rest."

"Will they want us any more to fight?"

"I don't think so—not you, anyway."

Stokes and Flora moved toward the hall door, the woman tripping hanging on her husband's arm. Bassett's voice arrested them.

"Mr. and Mrs. Stokes, just wait a minute. Where is your room or rooms?"

"We're together in a room on this floor out in the hall here opposite the stairs."

"I'd rather Mrs. Stokes went up to the second floor." He turned to Bassett. "You have space up there, I suppose?"

"Space?" It came from Miss Pinkney before Bassett had time to answer—these findings of the law did not realize where they were. "We've put up more people here than you could get into one of those five-story hotels up your way."

"Take her things up there. You help her."

Flora turned stricken eyes on her husband. He said nothing but very gently loosened her fingers on his arm. They trailed away, Miss Pinkney stalking ahead. Mrs. Cornell and Anne made their exit by the opposite door. But were silent as they climbed the stairs. Mrs. Cornell's door opened and closed on her and Anne faded on to hers on the side stretch of the gallery. She looked down into the lighted room, saw Anne move toward the entrance, heard his voice, and started.

"Why, there's someone down by the dock!"

The other men wheeled sharply, on the alert. She stopped, head bent, listening.

"Patrick—the d-d fool." It was Williams. "Told to watch the cause way and standing up there like a lighthouse."

"Oh, it's your man. I'll go down and tell him." Shide wanted to help all he could before his retirement to the butler's bedroom. "He ought to be where he won't show, is that it?"

"Yes, tell him to show his carcass somewhere out of sight. He ain't there to advertise the fact he's on guard."

"If he gets in the shadow under the roof of the lighthouse," said Bassett, "he can command the whole length of it and not be seen from either side."

"That's the dope. The neck of this bottle's the causeway and it's going to be cooked good and tight tonight."

Anne's door closed without a sound. The three men turned back from the entrance. "Is that woman gone upstairs yet?" Rawson murmured to his assistant as Williams stepped to the middle of the room and watched the gallery. He continued to watch it till Flora and Miss Pinkney appeared and finally were shut away behind their several doors, then he looked at Rawson and nodded.

"Now," said the district attorney to Bassett. "I want you to show me where that pistol was."

Bassett indicated the desk.

"In the third drawer of the desk. Miss Pinkney is certain it was there this morning."

"While you were running round at the point the house was empty?"

"I think Mrs. Stokes was here all the time. I never saw her outside."

"Any of the others come up?"

"I'm not certain of all of them. I know Shide did; I sent him back to phone over to Hayworth for the boats. And Stokes did, he came up for the electric torch when I was in here telephoning to you."

"Then neither of them knew the loss of the revolver had been discovered and they had plenty of opportunity to return it to the desk?"

Bassett nodded, and after a minute's cogitation Rawson went on:

"Doesn't it seem odd to you that no one saw Mrs. Saunders when she came back to the house?"

"No. They were all in their rooms, except Shide, who was down at the Point, and Mrs. Stokes, who was reading on the balcony. I asked her particularly if she'd noticed Sybil pass, and she said no, she'd been interested in her book and wouldn't have noticed anybody."

"I'd give a good deal to know what Mrs. Saunders did in that time. I think it would let in some light."

"How so?"

Rawson narrowed his eyes in contemplation of an unfolding line of thought.

"Well, what took her out again to the Point after she'd come in? She hadn't a good deal of time and she wanted to change her clothes before supper. It looks to me as if she met someone in the house, someone who wanted her to go down there with them."

"Mrs. Cornell says she was alone."

"She might have started alone and gone to meet them."

"Then it couldn't have been Stokes," said Williams. "For Mr. Bassett says she wouldn't speak to him if she could help it."

"That's right," Bassett nodded in agreement. "She'd never have made a date with him. She slugged him like the plague. If you knew her you wouldn't see anything in that going out. She was restless and unhappy and the place here—the sea, the views—fascinated her. It was our last evening and it was like her not to want to miss any of it, slip out for a minute to enjoy the end of it."

"And came upon someone waiting for her—lying in wait and—"

Rawson did not finish. A third and crackling crash came from the living room. The three men rose with a simultaneous leap and ran for the door.

(TO BE CONTINUED.)

THE PERFECT LIFE

A Preachment for the Beginning of the Lenten Season.

The Lenten Season is the Season when people are asked to think of their own characters. Every one has a deep down feeling that he or she would like to be perfect.

The formation of character depends upon the struggle between two opposing forces. We know something about forces, we modern men and women who lead practical lives. Watch, watch, if you are now of a scientific turn of mind a great lake or sea in a storm. Notice how the ships are tossed about like so many chips of wood, how the breakwaters erected by man fall under the lashing of the waves. Stand on the brink of Niagara and listen to the thunderous music of the falling water; you are face to face with a great natural force, a great fact. Go in the mountains when the thunder is gathering; watch, if you like, the procession of clouds, listen to the reverberation in the caves as the mirrored light which flashes, which illuminates the almost lurid gloom. As you hear the crashes of thunder and behold the flashes of lightning, acknowledge to yourself that you are face to face with a mighty force.

Then turn from nature to that vast and varied thing, so beautiful, so tender, so perfect, so heart-breaking, so triumphant, turn to human nature, and there what are the forces you find? I submit that you find three great workshops where constantly forces are being forged that form your character.

First there is the workshop of the imagination. It is a great and wonderful workshop; it is endowed, it is equipped, as it was built by God. It can deal with things with exactness and idealism. It can bring up the distant past or make the future present. In the midst of thunder clouds it brings the vision of sunlight and beauty that is but hidden. But it can also forge one terrible weapon, it can forge terror; for imagination, remember, is the workshop of the sense of fear.

You have not only imagination, you have also the workshop of the sense of pain. Pain is the deepest thing in life. Pain may make men brave; but pain may make men cowardly and sometimes the sense of pain, the possibility of pain forges a weapon very much like the weapon forged by the imagination. It forges terror; it forges also fear. Then remember the third workshop. There is the workshop of pas-

sions—those fierce uncontrolled desires that carry men and women perhaps on a wave of anger whither they know not. Passion leads, golden tokens, strains, lowers, enables, and forges within each one great weapons for failure or success in life. Passion is indeed a mighty force. So it is a workshop, and like imagination or pain, all controlling unless we temper it and govern the workshops by the power of the Crucified One.

Let us live in hope. Remember you may paint your hope darkly; or you may paint it by faith in the colors of eternity. Christ has died; Christ has promised. Many hopes may be buried; wrap them in the spirit of Christ and they have resurrection. And when you feel the surges of mighty powers within the sanctuary of your personality lift up your heart. God is guiding. He is not of the stuff to leave a vast universe go on its way uncontrolled. Let hope do its work. First make you cheerful in work and sorrow. Then make you perseverant; and try again, and try again, and try again. And then make you pray, for prayer is the language and voice of hope, and hope is the inspiration of prayer.

Resolve to live a life of complete and loyal character in the Love of the Great Teacher. You will achieve an indomitable hope, for before you lies the hope of glory. You cannot lose what you must train and know the rules as far as you can. Then you will receive the crown, for there is a crown of great value for an inconquerable hope that lies within you.

Save Pennies—Waste Dollars

Some users of printing save pennies by getting inferior work and lose dollars through lack of advertising value in the work they get. Printers as a rule charge very reasonable prices, for none of them get rich although nearly all of them work hard.

Moral: Give your printing to a good printer and save money.

Our Printing Is Unexcelled

CHRISTIAN SCIENCE CHURCHES

"MAN" was the subject of the Lesson-Sermon in all Churches of Christ Sunday, March 6.

The lesson, "I am from Isaiah 42:1. 'These people have I formed to myself; they shall show forth my praise.'"

Among the citations which composed the Lesson-Sermon was the following from the Bible: "Then answered Jesus and said unto them, Verily, verily, I say unto you, The Son can do nothing of himself, but what he seeth, the Father do; for what things soever he doeth, these also doeth the Son likewise. For he loveth the Son, and sheweth him all things that himself doeth; and he will show him greater works than these, that ye may marvel" (John 5:19, 20).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Immortal man was and is God's image or idea, even the infinite expression of Infinite Mind, and immortal man is coexistent and co-eternal with that Mind. The spiritual man's consciousness and individuality are reflections of God" (p. 330).

NASH

Leads the World in Motor Car Value

23 Models—4 Wheelbase Lengths.
Prices range from \$865 to \$2090
f. o. b. factory

Never before in its history has Nash offered so compellingly attractive an array of motor car values.

Colorfully finished in exquisite blends and harmonies, of supreme gracefulness in line and design, and richly appointed and fitted thruout, this great group of 23 models provides America's most inviting opportunity in the selection of a motor car.

Embraced within this notable array of body styles are three distinct series—the Light Six, Special Six, and Advanced Six, and 4 wheelbase lengths, for the Advanced Six Series includes models of extra long wheelbase.

And of particular interest is the sensational new Nash body design as exemplified by the new Cavalier model and the new Special Sedan on the Special Six chassis, and the new Ambassador and the new Special Sedan on the Advanced Six chassis, together with the superb new Light Six De Luxe Sedan—the style car of the \$1000 field.

Each model of the 23 possesses the superlative performance ability of the great Nash 7-bearing motor—the world's smoothest type.

And each model offers as standard equipment, at no extra cost, 4-wheel brakes of special Nash design, and 5 disc wheels.

C. J. DONALDSON

LOCALS

Mrs. Nick Baker is quite sick at this time.

Nell Shultis transacted business in Chicago, Wednesday.

All kinds of garden seeds on sale. Chase Webb.

George Garland was a Waukegan visitor on Tuesday evening.

George McCredie, of Lake Villa, was an Antioch visitor on Wednesday.

Mr. William Story, of Stager, Wis., was calling on relatives here over the week end.

The S. Boyer Nelson family were released from the scarlet fever quarantine on Tuesday.

Mr. and Mrs. L. C. Lutz motored to St. Joseph, Michigan, Monday to visit relatives, returning home on Wednesday.

Mr. and Mrs. Frank Dibble have returned to their home here after spending the winter months at Ft. Lauderdale, Fla.

Good work shoes, all sizes, worth the money at Webb's.

Mr. and Mrs. Chris Mortensen and children visited Sunday at the home of Mr. and Mrs. Earl Shales and family at Woodstock.

Mr. and Mrs. Lloyd J. White and son Lloyd, of Waukegan, were Sunday guests at the home of their parents, Mr. and Mrs. A. G. Watson.

Mr. and Mrs. Will Quinn, of Waukegan, and Mr. and Mrs. Lorraine Quinn, of Racine, were Sunday guests at the home of their aunt, Mrs. Sarah Pullen.

Miss Martha Hillebrand returned home last week from Roseland, Florida, after spending the past three months with her parents, Mr. and Mrs. William Hillebrand, who are spending the winter there.

If you are going to paint, we have a full line. Chase Webb.

Mrs. J. C. James visited at the home of her son, Ralph James, Chicago, whose wife has been very ill and also at the home of her daughter, Mrs. Carroll, the past week.

Get your auto license at once. Next week will be too late, take my advice. Do it now. J. C. James. (28p)

Mr. and Mrs. A. W. Hock visited relatives in Kenosha, Sunday.

J. Wilson McGee was a Chicago visitor on Sunday and Monday.

Mr. and Mrs. Lester Nelson have rented the Wilton flat on Park ave.

Mr. and Mrs. Homer Stevens are guests of their son and family at Waukegan.

Mrs. Clara Johnnot, of Champaign, Ill., was in Antioch calling on old friends Saturday.

Everything in rubber footwear at Chase Webb's.

Mr. and Mrs. Joe Torrens and children, of Austin, were Sunday guests of Mr. and Mrs. Lawrence Hoffman.

Mr. and Mrs. Leland Watson and son, of Waukegan, were Sunday guests at the home of their parents, Mr. and Mrs. A. G. Watson.

Several from Antioch attended the home talent play "Safety First" at Fox Lake last Friday evening. They report the play as being very good.

Order your alfalfa, timothy and clover seeds now and get the best. Chase Webb.

Mrs. Andrew Harrison was in attendance at the regular meeting of Perry L. Austin Fortress, National Daughters of the G. A. R. at Waukegan on Friday night.

Mr. and Mrs. N. L. Nelson and Mrs. Chris Sorenson, who spent the past three months with relatives in Denmark, returned to their home here last Thursday. They report having had a very pleasant trip.

Mrs. James Coyne, formerly of Antioch and two sisters, Mrs. Roger Sullivan and Mrs. James Furlong, left Thursday evening for Los Angeles, Calif., being called there on account of illness of their brother, Thomas Quinlan.

Mr. Cook, of Chicago, who was here visiting Mrs. Cook's parents, recently was taken seriously ill and had to be taken to his home in Chicago. Later it was found that he was suffering with appendicitis. At present he is doing nicely.

Try my 45 cent Chase and Sanborn coffee, guaranteed. Chase Webb.

Mr. and Mrs. Harry W. Haas have returned to their Bluff Lake home after several months sojourn in southern Indiana and southern Illinois, where they have very pleasantly spent the winter months visiting relatives and friends.

Dr. J. D. Hardin was in Waukegan on business on Monday.

Mrs. Oliver Cubbon, of Waukegan, was an Antioch visitor on Saturday.

Mrs. A. Hauke and daughter visited relatives at Wheatland, Wis., on Wednesday.

Mr. and Mrs. Wm. Hall are the parents of a baby boy, born Wednesday, March 9.

Mr. and Mrs. Alonzo Runyard are the proud parents of a daughter born last Thursday at the Victory Memorial hospital.

Mr. and Mrs. D. B. Sabin returned home Tuesday after spending the past two weeks visiting at the home of their son, Merrill at Springfield, Ill.

Joseph Rosenbach, of Oak Park, spent Sunday and Monday with Lester Nixon, attending high school with Lester all day Monday. Joe declared the small high school much more pleasant than the larger ones.

Mr. and Mrs. Will Rogers, of Roife, Iowa, spent the past few days visiting Antioch friends. Mrs. Rogers was formerly Miss Ella Bates, youngest daughter of Mr. and Mrs. David Bates. Mr. and Mrs. Rogers, who have spent the past winter with their son at Annapolis, Maryland, and Mrs. Angle Caldwell at New York are on their way home.

Mr. and Mrs. Frank Dunn, Miss Margaret Dunn and Robert Dunn, Mr. and Mrs. J. Dunn were in attendance at a miscellaneous shower at the Frank Murphy home in Kenosha, Sunday afternoon. The shower was given for Mr. and Mrs. James Rogan, of Bristol, whose home was burned last Wednesday night.

Work clothing, all sizes at Webb's.

Purchasers of pianos from the Bankrupt Liquidation Co., here last week included Mike Rauen, Spring Grove, Wm. J. Fish, Ralph Fields, Mr. Norton. Twenty-five radio sets have been sold by the Company.

DANCE FRIDAY NIGHT
"The Black Panthers," a local orchestra, will give a dance at Parish Hall on Friday night of this week. Admission will be 75c per couple.

ARTHUR HADLOCK, Oph., Registered Optometrist, of Chicago will be here Sunday, March 13. If you are in need of glasses please call and have your eyes examined on this date at my place of business.
WM. KEULMAN

Boats built, repaired and painted. Work guaranteed. For further details apply at Chicago Footwear Co., Antioch, Ill.

CARD PARTY
There will be a "500" card party at the Danish Hall on Ida avenue on Monday night March 14, at 8 o'clock. Prizes and lunch. Price 25 cents. Everybody welcome. (28p)

Antioch's Old Reliable Dentist will be in Antioch every Tuesday and Wednesday and on Tuesday evening of each week. Phone 112J or Farmers' line. DR. F. S. MORRELL.

Toll Taken by Hair
It is estimated that throughout the world hair extracts from the human race in one year a toll of something like \$200,000,000.

How It Looks to Others
Determination in a friend may look like bull-headedness in an enemy, and self-respect in a friend may appear as conceit in one not so loved.—Marlon (Ala.) County News.

GIVE PARTY FOR HIGH SCHOOL TEAMS

The basketball season closed in Antioch last Saturday night with the powerful team of Warren playing the final home game with the locals. In honor of this event, which was the last game the boys will ever play together in their home town, Mr. and Mrs. J. C. Nixon decided to give the athletes a treat in the form of a surprise party on their son, Lester, the party being given not only to the basketball players but to all the athletes who have brought so many well earned honors to Antioch. Football and base ball players were also invited guests. Antioch high school athletes have won four trophies.

George Schlosser sent "Nick" to replace two burned out fuses at the Parish Hall, where his friends congregated, and instead of burned fuses he found the party.

Lola White and her boys kindly donated their services, and played for the dancers.

The dining hall was beautifully decorated in the school colors, red and grey, the favors being miniature basketballs and footballs. The table was adorned by the trophies these boys so honestly earned.

The athletes were honored by the presence of their various lady friends and by Mr. and Mrs. Bright, Mr. and Mrs. Watson, Mr. Jepson and Mr. Stark, the instructors who so ably assisted them in their athletic duties.

Out of town guests were: Mr. Dixon and his Oak Park friend, Mr. Karl Norberg. "Nick" Oak Park pal, Joseph Rosenbach. Cornelia Roberts and her roommate Florence Hood came in from Urbana to be at the party. Helen Peters, Gertrude Hurley, Elizabeth Bauer, and Edith Carter, of Chicago. Mr. Bright and Mr. Watson gave some interesting speeches which the boys eagerly listened to. After a delightful supper, bunco was played, the prizes being won by Helen Peters, Vida Palmer, Jean Abt, Arnold Shunnesson, Emil Halwas and Lester Nixon. After bunco the youngsters danced into the early hours of the morning, declaring it to have been a real party, one they would never forget.

Band, Heart Of Community

John Philip Sousa Sees Extension of Band Ideas Along Baseball Lines. "LET US BAND TOGETHER!" That's the rallying cry of friends of the municipal band proposition, upon which Antioch voters are to ballot at the April election. The proposal, which aims to take advantage locally of the Illinois municipal band statute, calls for the levying of a small tax of two mills, for band purposes.

Antioch citizens who see in a municipal band an added stimulus to civic pride found encouragement this week in a statement made public by Lieut. Com. John Philip Sousa. In this statement, the "king of band leaders" made his views on municipal bands known as follows:

"Music, in the American community, began with the band and with the village choir or singing society. The band has made the heart of civic pride and devotion in villages and small towns for years. It would be interesting to take a census of America's well-known men, who, at one time in their lives, were band players. The late President Harding was one of these—he told me so. Almost any man can be taught to play in a band and almost any man enjoys it.

"What I should like to see in this country, what I believe would do more than anything else for its musical development, is the extension of the band idea along the lines developed by organized baseball. This game was once a purely local thing; isolated teams were here and there, in school, or village, or factory. We know what it has become. Why can not the American band be made as vital and universal a part of our every day life?

"I believe there might be band organizations as there are baseball teams, with major and minor league teams. Why should not music as well as sport be helped by stimulating local pride and the keen joy of competition. Such an organization of bands would arouse popular interest, particularly among the young. Not every boy in town belonging to a band league would make music his work in life, but he would find it as natural and pleasant to go to a concert as to go to a baseball field, and they needn't conflict."

Hertz Company Find Fords Most Economical

In an advertisement published in the New York Times—one of the largest circulations in the newspaper world—the General Motors subsidiary—The Hertz Drive-up-self—admits that they cannot operate their own make of small car as cheaply as they can operate a Ford car.

In this advertisement appears a schedule of rental prices which shows the comparative operating costs of Ford open and closed cars as compared with the pride of the General Motors Corporation. They do not guess. It is cold-blooded business proposition with the Hertz Drive-Up-Self people. They are in business to show a profit. They want to rent cars to the public at the lowest possible rate because that increases the volume of their business. This concern has been operating cars for some time, and after close scrutiny of the operating costs find they can rent Ford cars to the public quite a bit cheaper per mile than they can their own make small car, figuring depreciation, repairs and cost of operation, gas, oil and insurance. All rates quoted by this company including gasoline, oil and insurance.

They quote a rate per hour for a Ford open car at 75c; for their own small car \$1.05. This speaks for itself. If this concern can afford to operate a Ford car for a patron, allowing for all features of operation and make a fair profit per mile, it would necessarily follow that the cost of operation of a Ford car owned by an individual would be a highly reasonable and mighty inexpensive method of transportation.

This advertisement of a General Motors Corp. subsidiary is the finest testimonial and tribute to Ford operation that has been paid in many a day.—Advertisement.

FOR SUPERVISOR

I wish to announce to the voters of Antioch township that I will be a candidate for re-election to the office of Supervisor at the election, Tuesday, April 5, 1927. I will appreciate any support.

H. F. NABER.

Longest Year in 47 B. C.

The longest calendar year on record was 47 B. C., according to Liberty. By order of Julius Caesar, it contained 445 days in order to make the seasons conform to the solar year.

FARMER FATHER AND SONS BANQUET

(From Wisconsin Agriculturist.)
 Father and son banquets are getting to be quite common affairs in the large towns. So far as we know there have been but a few of them held in the country. It was our pleasure to attend such a banquet in Antioch, Illinois, the evening of February 16. Over 100 dads with their sons sat down to the banquet table. They ate a good hearty meal prepared by the domestic science girls of the local high school and then discussed some of the problems that confront the future farmers.

One of the most interesting parts of the program was the remarks made by John A. Thain, a farmer who is successfully operating a 180-acre farm in Lake County, Illinois. Mr. Thain is the third generation of Thains to operate the same farm. He spoke encouragingly to the boys about the future of farming, especially calling attention to the fact that farming is now a business where the profits must come from the products grown rather than from the rise in the value of the land. That, explained, must come through economy of production and organization of distribution.

A new custom was inaugurated by the agricultural club of the high school, that of honoring some one farmer annually for his accomplishments in farming and for his true worth as a fellow townsman and citizen. The club presented Mr. Thain with a certificate of recognition in the presence of his neighbors and friends. No greater compliment can be bestowed on a man than that of being honored in his own home town.

J. E. Hill, in charge of vocational agricultural teaching in the high schools of Illinois, told briefly of the work being accomplished and stated that there were over 5,000 boys enrolled in the high school agricultural classes of the state and

that over 60 percent of the boys that had graduated from these courses are now actively engaged in farming. That these boys have put their training to good use is best illustrated by the fact that during the past year their fields of corn yielded 48 bushels to the acre whereas the state yield was under 40 bushels per acre. "They are living proof that agricultural training does pay," concluded Mr. Hill.

The banquet was arranged by C. L. Kutil, a former Manitowoc County boy, who is now teaching agriculture in the Antioch High School. He was ably assisted by William Schwenk, a high school boy who is president of the local agricultural club. This young man has made a great success of growing and marketing poultry while continuing his high school education.

TOWN ELECTION WILL BE HELD APRIL 5

The annual town meeting and election will be held on Tuesday, April 15. But one office is to be filled, that of supervisor. The petition of B. F. Naber as a candidate for re-election to that office has been filed with C. F. Richards, town clerk.

Mrs. Alice I. Little, who left here several months ago to make her home in California, has purchased a nice five room bungalow at West Hollywood, according to word received here by friends. Mrs. Little's new address is 8811 Coverly Drive. The vicinity where she is now living is at the foot of the mountains and is known as the Beverly Hills district, a very beautiful country, according to Mrs. Little, who says their rainy season is over and the weather there is like that of Illinois in the springtime.

Mont St. Jean to France

Mont St. Jean is the French name for the battle of Waterloo.

FARM BUREAU NOTES

Jensen's Sale a Success.
 Chris Jensen's Bred Sow sale which was held last Friday at Cold Spring Farm offered one of the finest lot of Duroc gilts that has been offered for some time. The gilts which were offsprings of grand champion ancestors, are a credit to Lake County. Mr. Jensen was well pleased with the \$63 average which he received for these gilts, 51 being offered.

Had the big breeders realized that gilts of this class were in this sale they would have been here and many of these would have brought from \$100 to \$150. One gilt went to Louisiana, another to Memphis, Tenn., and another to Clinton, Ill., for Pig Club work. A bunch of eight went to Naperville.

"The farmers of Lake County can well afford to pay considerable attention to the bred sow for the combination of the cow, sow and hen is second to none."

Seed Day.

The Seed Day which was staged at the Farm Bureau office last Wednesday attracted considerable attention. Many bushels of seeds were on display but there was a noticeable lack of buyers. There is some good grain in the county and it will behoove the farmers to purchase their seed grains as soon as possible before this supply is gone, especially seed wheat which is very scarce.

The Farm Bureau compiled a list of the seeds which are still for sale by the men who have grain to sell and will be glad to let people know where this seed is located.

Monthly Executive Committee Meeting.

The regular monthly business meeting was called to order last Saturday afternoon at the Farm Bureau office by President D. H. Minto.

A report was made of the T. D. Committee and relief which has been effected by their cooperation with the Agricultural and Finance committees of the County Board of Supervisors. The progress being made is very gratifying.

A report was made by the Tax Committee in which the Assessors were commended in the constructive way which they are planning on going into their work next month.

Self-Knowledge

A well-known clergyman says every man should keep a diary so that he may know himself. The average man knows himself well enough to be certain that if he started a diary he wouldn't keep it up.

Timid Creatures

When women engage, in my presence, in their favorite amusement of abusing the men, I say: "Ladies, spare my blushes. Permit me to retire while you do us justice."—E. V. Howe's Monthly.

That Hidden Tax of \$420,000,000 Of which you periodically are paying your share

OVER four hundred millions of dollars! This is the burden carried this past twelve months by owners of poppet-valve cars for one cause alone—to remedy the engine-havoc wrought by carbon.

That this tremendous tax is entirely unnecessary is being demonstrated every day by the scores of thousands whose foresight and good business judgment led them to avoid the poppet-valve type of car and ensure for themselves complete immunity from all carbon troubles in the purchase of sleeve-valve Willys-Knights.

No carbon complications. No valves to grind. An engine that is fool-proof, wear-proof, practically trouble-proof—and which, because it has

from 118 to 158 fewer working parts, is almost wholly free from the need for adjustments or repairs...

These are the practical advantages that are yours in the superbly beautiful, exquisitely appointed Willys-Knight Great Six and its companion car, the "70" Willys-Knight Six. In the name of economy, and satisfaction, and pride in the beauty and performance-ability of your next car, you really owe it to yourself to become informed upon these cars before committing yourself to any less desirable automobile.

Willys-Knight Great Six prices from \$1850 to \$2295; "70" Willys-Knight Six, from \$1295 to \$1495; f. o. b. factory and specifications subject to change without notice... Our Finance Plan offers unusually attractive credit terms.

Wilmot News

The Girls' Society of the Union Free High School gave several vocal selections at the Silver Lake P. T. A. meeting Tuesday evening.

Miss Blee the graded school teacher has returned after an absence of several weeks.

Dorothy Huff, daughter of Mr. and Mrs. Charley Huff, died suddenly at the home of her parents Monday. Miss Huff had not been well for some time, but her death came as a surprise to her many friends.

The William Lake home has been quarantined for whooping cough.

Miss Hansen, Miss Peterson and Mrs. Robt. Ellison attended the P. T. A. meeting at Silver Lake Tuesday evening.

There are several new cases of mumps among the school children.

Mrs. Walter Carey, who has been ill for sometime is recovering at the home of her daughter, Ermin Carey in Miami, Florida.

Louis Gaunt has moved on the D. J. Vincent farm near Wilmot.

Jerry Levinuske has a new Chrysler car.

The Old Time Dance was given at the Woodmen Hall, Tuesday evening. It was largely attended, and music was furnished by Jack Elert and Eugene Frank.

Don Herrick has purchased a new Chrysler coupe.

Mrs. John Hazelman spent Thursday in Kenosha.

Mrs. Jerry Levinuske accompanied Mrs. Philip Levinuske to Chicago one day last week.

Fred Albrecht is re-decorating his barber shop.

Fred Gauger has a new Essex coach.

Mr. and Mrs. Ivan Newell attended the funeral of Dorothy Huff on Thursday.

Mr. Schmurr was called away suddenly because of the death of his father.

Lenten services were held at the Lutheran church Wednesday evening.

Raymond Stoxen has a new electric stove.

Miss Jedeke took the civics class of the Randall school at which she teaches to Kenosha to visit the court house and the jail.

Miss Blanche Carey and William Vollbrecht are serving on the jury.

Mrs. Raymond Stoxen and children spent Friday at the home of A. C. Stoxen.

Mr. and Mrs. Arthur Holldorf were in Kenosha Wednesday.

Arthur Stoxen spent Saturday with his parents, Mr. and Mrs. A. C. Stoxen.

Mrs. Raymond Stoxen, Mrs. A. C. Stoxen and Ruth were in Hebron, Saturday.

Miss Viola Newell spent the week end with Captain and Mrs. Weisse, of Camp Lake.

Fred Vanderson has moved on the Tom Loftus farm.

Mrs. Charley Kams Sr. visited Mrs. L. Hazelman, Friday.

Several folks of Wilmot attended an "Old Fashion Dress Party," given by the Eastern Star, which was held at Mrs. Geo. Bruehl's home on Friday evening. Enchre was played, after which lunch was served. Prizes won by Mrs. Chas. Loth, Mr. Chas. Loth; consolation by Mrs. Phillips and Floyd Lubeno. Costume prizes were won by Mrs. George Bassett, her gown being one hundred years old. Mrs. Ray Bifton received 2nd, Mr. George Roepke and Bert Dean also received prizes.

The Eastern Star of Wilmot will give a card party and dance on Friday evening, March 11th, at Dalton's Hall, Silver Lake. Five hundred, enchre and bunco will be played. Lunch will be served.

Otto Lukdes sold his farm to Mr. O'Brien of Chicago.

Mr. and Mrs. Frank Kruckman spent Sunday in Crystal Lake.

Mr. and Mrs. T. R. Anderson, who have been visiting Mr. and Mrs. Frank Kruckman left Sunday.

A tractor demonstration was given Wednesday afternoon by Mr. Harry MacDougall and Mr. George Dean. A movie was given in the evening, which consisted of seventeen reels. The demonstration was largely attended.

A surprise party was given for Fred Mecklinburg, Saturday evening. Cards were played. Lunch was served at mid-night.

Mr. and Mrs. Winn Peterson and family were Sunday guests of Mr. and Mrs. Alfred Reynolds.

Mrs. Brinkman is seriously ill and under the care of Dr. Pauly, of Burlington.

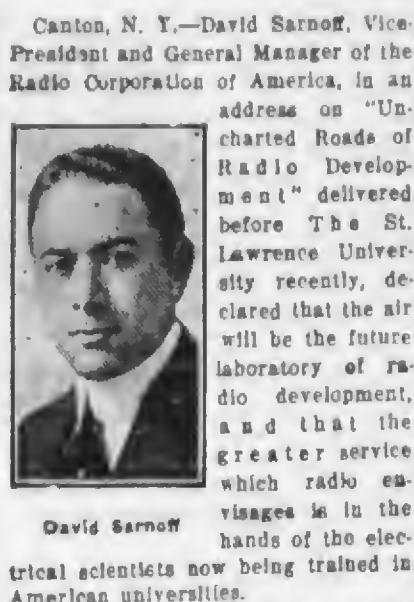

Mr. and Mrs. Drake, of Edgerton, spent Sunday at the home of Mr. and Mrs. Fred Gauger.

Mrs. Louis, of Silver Lake, spent the week end with her sister, Mrs. Frank Burrows.

C. Stoxen were: Mr. and Mrs. Aus-

Great Radio Problems Yet Unsolved, Sarnoff Tells Students

In University Address, Radio Leader Outlines Fields for Original Research and Development.

David Sarnoff

Canton, N. Y.—David Sarnoff, Vice-President and General Manager of the Radio Corporation of America, in an address on "Uncharted Roads of Radio Development" delivered before The St. Lawrence University recently, declared that the air will be the future laboratory of radio development, and that the greater service which radio envisages is in the hands of the electrical scientists now being trained in American universities.

"It is true that the building of a transmitting or broadcasting station and the construction of a radio receiving set have become matters of practical engineering and precise manufacture," Mr. Sarnoff declared. "We also know that electrical energy generated at a given frequency can be radiated in the form of electrical waves which travel in every direction. We know too some of the laws that govern the effective detection and utilization of such electrical signals and we have developed methods of amplifying these signals till they reach an audibility satisfactory to the human ear."

"But of the laws that govern the propagation of electro-magnetic waves over the earth and through the air we know little. In this field we encounter a bewildering haze of theory. Much further scientific investigation is required before the problems will be solved."

"We know that with the same given power at the transmitting station we can cover greater distance over salt water than we can over land; we can in general cover greater distance over flat land than over hilly country, over moist land than dry land. We have noted the absorption of wave energy by mineral deposits in the earth. We are just beginning to glimpse the possibilities of short wave transmission—that is, transmission with wave lengths of 100 meters or less. We find, in some instances, that reception is good at a point 2,000 miles from the transmitter and very poor at a distance of 200 miles. We are able to cover extraordinary ranges with low power short-wave transmission, but often are unable to communicate over comparatively short distances. But the fact remains that our understanding of the physical phenomena involved has made comparatively little advance over the theories formulated by Faraday and Maxwell."

Three Basic Technical Problems

"The great technical problems of radio communication are static, interference, and fading. We have discovered many palliatives for these ills but no cures.

(a) Static

"The proposed solutions of the problem presented by static, as Dr. E. F. W. Alexanderson so ably points out, have been dominated by two working theories. One is that static is a disturbance in the atmosphere, different in its electrical nature from a radio signal. The second theory is that the disturbing waves resemble the signal but come from all directions, while the signal itself comes from only one direction. Under the first theory we have attempted to filter out the static electrically, but we find that we often leave a residue of signal almost too weak for usefulness. The Radio Corporation of America has been much more successful in its application of the second theory, whereby a system of reception is used that responds selectively to the waves from one direction and excludes those from other directions.

(b) Interference

"Beyond the highly-selective methods of reception already adopted, one of the greatest hopes of solving the problem of interference, that jumble of transmission between signals from different stations, lies in the further exploration of short wave transmission. Short wave lengths promise to open up not only new paths for wave propagation, but a large number of useful communication channels. Consider that almost all the long-wave transatlantic telegraph stations in the world are crowded into a frequency band about 15,000 cycles wide, whereas the available short-wave field below 100 meters includes approximately 30,000,000 cycles, and you will have some indication what the future may bring forth in the way of additional radio communication facilities.

(c) Fading

"Of the mysteries of 'fading,' that largely inexplicable diminution of signal strength, we know only that there are three kinds: First, is the great variation between daylight and night reception; second, is the sharp decrease of signal strength which is usually observed around sunrise and sunset; and, third, is the sudden variation of signal strength in broadcasting, when a sharp rise or a sharp drop may be noted of two or three seconds or even of many minutes' duration, down to periods so short that the variation becomes an audible frequency modulation which distorts the signal."

"One might almost wonder at the self-restraint of modern science in leaving so much to be discovered by the generations of future scientists. In our investigations of the behavior of electro-magnetic waves, we seem to be trembling on the edge of many fundamental facts. Light itself, as Professor Pupin and other great authorities have shown us, is an electro-magnetic phenomenon, and the electron that compose every atom in the blazing sun are each busy though tiny broadcasting stations, sending their messages in all directions.

"A more exact knowledge of the possible transformations of light waves and electro-magnetic waves would bring the day nearer when the transmission of sight by radio would be as common as the transmission of sound. We have cleared much of the ground in this connection. We have already demonstrated the possibility of the wireless transmission of images over great distances. Photographs of current events sent by radio to and from London have been published within a few hours by the newspapers of the two cities. We have transmitted photographs by wireless across the American continent, from Honolulu to New York, and this development continues.

"More fundamental discoveries with regard to the handling of light waves and electro-magnetic waves must be made before television, the art of transmitting instantaneously changing scenes and moving objects, can be considered an accomplished fact. The vista which such a period of radio transmission would open up, especially in the realm of higher education, is inspiring indeed. To the power of exposition now inherent in sound broadcasting would be added the power of demonstration made possible by the broadcasting of sight."

RADIO DEVELOPMENT A BOON TO MOTION PICTURE ART

"In one respect at least this problem has been solved in our electrical laboratories, that is, in the synchronizing of sound and sight. It is no longer disclosing a laboratory secret to announce that the Radio Corporation of America will soon demonstrate publicly a method of speech and musical synchronizing particularly adapted to the motion picture art and using the latest principles of sound reproduction developed for radio."

New Relationships Created

"From whatever angle radio is viewed, the great opportunities are before, not behind. Radio has created a multitude of new problems, which cry to be led out of the wilderness. Let us consider, for example, the problem of regulation, and the definition of radio rights in the air. These are entirely virgin subjects in law. One of the basic problems to be solved is the ownership of the air space above the land and water. Shall we heed or cast aside the ancient maxim, 'That he who owns land owns it to the heavens above and to the center of the earth, from the zenith to the nadir?' To uphold this maxim would be to prohibit aerial navigation for, as an authority points out, every flight would constitute innumerable, actionable trespasses. Radio is a greater trespasser than the flying machine. No bars or windows can completely keep out electro-magnetic waves; radio broadcasting enters into every home. And yet this ancient maxim, adopted by the courts of England centuries ago, has the endorsement of such eminent authorities as Coke and Blackstone, for at that time the upper air space was not utilized. Under this maxim of law it has been held to be a trespass to thrust one's arm into the space over a neighbor's land."

A Great Force in Education

"The fact that broadcasting is essentially a system of mass communication has somewhat obscured the great potentialities of radio as an instrument of education. It is true that any universal system of broadcasting must be governed largely by majority demand, and the demand for entertainment in broadcasting is much greater than the demand for education. Nevertheless the fact remains that education is the highest purpose which broadcasting can serve. Radio offers to the educator an auditorium many times greater than the combined capacity of every college auditorium in the country. When radio can add sight to sound, demonstration to exposition, it will be able more closely to project the work of the university classroom.

"At present the educational world still faces the task of devising a system of popular education suitable for transmission over a universal broadcasting system. The greater opportunity will come when specialized broadcasting systems are made possible by the opening of additional channels in the air, and sight is added to sound in radio transmission.

"Radio is now losing the bloom of romance that characterized the early beginnings of every new art. It is taking on the firm outline of an established art and a flourishing industry. As such it beckons to the scientist, to the artist, to the educator and to the business man, to come forward and contribute to the progress of mankind."

SALEM

Alfred Schmidt spent the week end at Madison.

Miss Florence Bloss, of Madison, was home over the week end.

The Priests met with Mrs. Olive Muller on Thursday.

Mr. and Mrs. David Miller, of High street, visited with Mr. and Mrs. Peter Olson on Friday.

Miss Grace Romie and Ed. Miller, of Kenosha, visited Mr. and Mrs. Louisa Romie on Sunday.

Mrs. Byron Patrick entertained at the bunco club on Thursday afternoon. The prizes were awarded to Mrs. P. Manning, Miss Ida Stevens and Miss Esther Pease.

Mr. Chas. Curtis and Mr. Leslie Holbrook called on Salem friends Thursday.

Misses Hope, Jennie and Josie Loecherer and Mrs. Ada Hunteon motored to Waukegan on Sunday and visited Miss Velina Hope.

Miss Beulah Dibble is out of school with the mumps.

Directors of the Farm Bureau met at H. C. Stockens, Monday afternoon. Several orders were taken for lubricating oil.

Miss Jessie Blee is back at school after a two weeks absence.

Levi Charles Orris died at the home of his sister, Mrs. H. Cooper, at Waterford, Wis., Feb. 28. He was born in the Orris homestead in the town of Salem, January 23, 1866, where he lived until a short time ago when he moved to Waterford.

Mr. Bruno Zubb who has been in the store business in Salem for the past year has recently sold out to Mr. Kuklinaki, of Chicago. Mr. Zubb and family will move to Chicago and enter some other line of business.

The state inspector visited the Salem Center School last Wednesday and sent the school board a very favorable report.

The Jubilee Bunco Club met with Mrs. Frank Brunning in Kenosha on Friday.

Mrs. Frank Schmidt spent several days in Milwaukee last week where she is doctoring with Dr. Pfeiffer.

Mr. and Mrs. Fred Fox and Mrs. Kate Jarugo visited Mr. Fox's mother, Mrs. Fox, at Pleasant Prairie on Sunday.

Another improvement added to the Thursday.

Mr. A. R. Cornwell, of Kenosha,

Allendale School

Allendale Farm School, Lake Villa

Last Tuesday evening Allendale defeated Libertyville High-Lites by a 25 to 5 score at the Allendale gym.

Vilink and Wittkind were chief score getters with 11 and 10 points respectively.

On Tuesday evening Allendale played the North Chicago Blue Ribbons, champions of the Waukegan-North Chicago Industrial League.

On Saturday evening of this week Allendale closes its season against the Irving Park A. C. of Chicago, at the Allendale gym.

Baseball practices will be held daily commencing Monday with some 18 candidates for various positions. With six of last year's players on hand a good team is expected for this season.

Vilink, Wittkind and Zvoda will do the pitching. The first two are right-handers, while the latter pitches with his fork hand.

The season opens on Saturday, April 2, with Waukegan High School playing at Allendale.

Basketball.

Fould's Macaroni Co. team of Libertyville won the Central States District tournament held at the Allendale gym on Friday and Saturday of last week by defeating the North Chicago Community 5 in a fast and thrilling game, witnessed by a gym filled with wild spectators, by a 26 to 16 score.

Twice before this season North Chicago had won by large margins over the Libertyville crew, and were hoped to win the championship. The game was very close until the last three minutes when the Fould's team scored four baskets in succession to clinch the title.

Only one incident marred the tournament when Waukegan claimed a forfeit from Waukegan Y. M. C. A. for their failure to be on the floor at 9 o'clock Friday night. The Y boys were in the dressing room preparing for the game when the Waukegan manager claimed a forfeit at 9:03 o'clock. The scores were:

Friday afternoon—Riverside 37, Fox Lake 22, Highland Park 34, Rockford 26.

Friday night—Lake Villa 26, Libertyville Cardinals 25, North Chicago 2, Great Lakes 0 (forfeit), Waukegan 2, Waukegan Y 0 (forfeit).

Saturday morning—Fould's 47, Riverside 21, Lake Villa 39, Highland Park 49.

Saturday afternoon—North Chicago 38, Waukegan 22, Fould's 33, Highland Park 23.

Saturday night finals—Fould's 26, North Chicago 16.

ILLINOIS

UNIVERSITY NEWS

Antioch Men Figure in Athletics.

The University of Illinois' basketball team finished its home schedule Monday night when it defeated Wisconsin at Champaign 32 to 28. Daugherty, conference leading scorer, and the Illini's star forward scored but one field goal in the game to increase his lead over Hunt of Ohio eleven points. Ohio has two games left in which Hunt will have a chance of bringing up his totals as Illinois completes its schedules at Wisconsin Saturday night, March 5.

The Illini wrestling team defeated Iowa last week for the championship of Division "A" and meets Michigan hero at the University gymnasium Saturday afternoon, March 5, to decide the winner of the "Big Ten" championship. In the last six years since Paul Pheen has been coaching at Illinois, the Illini have been champions three times and joint holders twice.

Wesley Wertz was given an advanced command in the University R. O. T. C. Field Artillery brigade at the beginning of this semester. He is now first lieutenant and has charge of a Battery of freshmen artillerymen to drill two days a week besides doing his school work. Wesley is working his way through school by serving at the University Woman's Club here along with Albert Herman and William Kufalik.

Andrew Jackson's Politics

Andrew Jackson is popularly supposed to have started the modern Democratic party. It was to a large extent the successor of the Jeffersonians. But Old Hickory himself did not apply the name "Democratic" to his followers. During his Presidency and after his retirement to the Hermitage, in all his correspondence he called himself a Republican and spoke of his party as the Republican party.—Pathfinder Magazine.

BRISTOL

On March 5, 1927, the Bristol Equitable Fraternal Union met at the home of Mr. and Mrs. George Gilmore with twenty members present. A fine roast beef dinner was served including ice cream and cake. After the dinner hour a short business session was held, followed by a program thus: Piano selection—Master Mead Walker, Recitation—Alice Gilmore, Viola Solo, with Piano accompaniment—Mr. and Mrs. Frank Gethen, Vocal Solo—Mrs. Hazel Gilmore accompanied—Mrs. Nettie E. Gethen. All members were enjoyed.

The President (Mrs. Maude Walker) then arose and to the surprise of the Secretary, (Mrs. Nettie E. Gethen) made a short speech in commendation of service done to the Bristol Assembly during the past 18 years, by the Secretary. The President then requested the Warden to present to the Secretary a beautiful stand lamp as a token of appreciation for her efficient work. Upon receiving same, the Secretary responded in a few brief remarks of thankfulness in an effective manner. The social hour that followed was spent playing amusing games.

Two fires in houses damage Bristol homes in twenty-four hours last week. One in the village, another in the country charred in flames. The residence owned by James Hogan in southeast Bristol was wholly destroyed by fire Wednesday about midnight. Mr. Hogan, who was caring for a sick brother, was not at home, but the rest of the family were aroused by the crackling sound. Neighbors were summoned, who succeeded in removing some of the furniture. The loss was partially covered by insurance. The Hogan family moved into their home (formerly known as the Wilby Larcher home) last fall and had spent considerable money in remodeling it. The loss will be heavy.

About 12:30 p. m. on Thursday the small residence of Kirt Lavey was discovered with dense clouds of smoke rolling from the structure. The fire started in the southeast corner and soon reached the entire attic. The Bristol fire department finally succeeded in subduing the fire but much damage was done the interior with water and also the exterior by having to chop in to get the water supply where it was needed. The Salem fire department arrived just as the fire was subdued.

Rev. and Mrs. F. E. Frankson spent part of last week with the Gethens.

D. A. Richards is on the sick list. Mr. and Mrs. Frank Gethen attended the funeral of the two months old infant daughter of Mr. and Mrs. Charles Rockwell in Kenosha, Monday.

Mrs. John Clark, of Kenosha, spent several days last week at the Selby home.

Mrs. Era Lewis, of Kenosha, was a guest at the Stonebreaker home part of last week.

Miss Carrie Murdoch, of Union Grove is spending a few days with Mrs. Jean Thorne.

Masters George and Myrus Nelson visited their grandparents, Mr. and Mrs. George Bolton in Pikeville, Sunday.

Miss Ruby Bice, of Wilmet, and Miss Margaret Waldren passed the week end with Mr. and Mrs. Herman Burgess in Paris.

Mrs. L. T. Whitchee, Mrs. Jake Malecke Jr., and Mrs. Ed. Steffin attended the P. T. A. meeting in Union Grove, Saturday.

Roy and Fred Murdoch visited Mr. and Mrs. Harvey Gunter at Paris, Sunday.

Raymond Shumway attended a Standard Oil Co. agents' meeting in Burlington, Tuesday.

Mr. and Mrs. Louis Krohn entertained Mr. and Mrs. George Gehard from Kenosha, Sunday.

Allan Higgins entertained the

"Live Wires" in honor of Ward Rowbottom, who will soon leave Bristol to reside in Kenosha.

Mrs. Ada Dixon entertained her daughters, Mrs. Joe Steinback and Mrs. George Bryant, Sunday.

Mrs. Harold Walker is visiting her parents, Mr. and Mrs. Ed. Firchow.

Mrs. August Wolfe, Arthur, Florence and Rose, Alfred Hackbert and Harold Sheud, of Kenosha, were Sunday visitors at the Wm. Wolfe home.

Miss Freida Bolton and Henry Reintner, of Antioch, Ill., were Sunday guests of Mr. and Mrs. Lyle Bolton in Kenosha.

Miss Blanche Gray, of Paris, visited Mr. and Mrs. D. L. Burgess, Tuesday.

Mrs. Minnie Dixon and Mr. and Mrs. Charles Selby attended the wedding of William Sears and Mrs. Sadie Fletcher, which was held in the Methodist church in Antioch, Ill., Wednesday and also attended the reception held at the Sears home in Union Grove.

Rev. and Mrs. David Johnson and little daughter, visited relatives in Milwaukee last week.

Allan Higgins and Lyle Woodbury visited the latter's mother, Mrs. Nellie Woodbury in Alden, Illinois, Saturday.

Victor Due, of Round Lake, Ill., visited at the William Long home Wednesday.

Can Laugh at Cobra

The only animal immune to the bite of the cobra one of the most deadly of snakes, is the mongoose, according to an unanswerable question in Liberty.

Famous Literary Hoax

William Alexia, a German novelist who gained fame 75 years ago, brought out what purported to be newly discovered manuscripts by Sir Walter Scott, entitled "Walladmere." It had a tremendous sale until Alexia, having become famous admitted that it was a hoax.

Baptism by Sprinkling

The rite of baptism by sprinkling or pouring is supposed to have originated either in the Second or Third century and is alluded to in the writings of Cyprilian, who gave his opinion that in the case of those who were sick or unable to endure the rite of immersion it was a lawful baptism.

THURSDAY, MARCH 10, 1927

CARELESSNESS CAN BE CURED

San Francisco police and citizens are alarmed at the increasing number of automobile accidents occurring on the streets and highways. Last year 126 people were killed, and since January 1, fatalities have averaged almost one a day.

What is occurring in San Francisco is common to nearly all large cities. Careless driving is inflicting death or injury on an appalling large scale.

That accidents can be prevented by the railroads. The railroads meet the situation by organization of safety committees among their officers and employees. The committees' purpose is to eliminate carelessness by education in safe practices.

During the last seven years, the Southern Pacific alone has moved 300 million passengers more than 11 billion cumulative miles, without fatality to a passenger in steam train accident. In 1926 for each fatality to an employee in train and train service accidents, a train was run a distance equivalent to three times around the world.

Statistics of the Interstate Commerce Commission show a steady downward trend of accidents on all the railroads with each succeeding year, the direct result of systematic safety work.

On the other hand, vital statistics show that in 1926 more people were killed by automobiles in San Francisco alone than by all the railroads of the Pacific Coast, including fatalities at grade crossings.

We hear much clamor of taxing the people for grade changes, but very little of curbing reckless driving, which is claiming nine victims on the streets and highways for every one at grade crossings.

The way to reform is to reform. Automobile clubs and associations may well follow the example of the railroads, perfect a safety organization and educate drivers in safe practices. The railroads have greatly reduced accidents, and what they have done automobile associations can do, by adopting a like systematic method in dealing with accident causation.

Odd Chirography

Writing with both hands at the same time is a feat performed by a Liverpool (England) shipping clerk. He writes in the normal manner with his right hand and backwards with his left hand. When held to a mirror the words written by the left hand look like those written by the right.

Rations for Fighters

During the World war the German soldiers were supplied with tea and coffee without milk. Small rations of rum and brandy were furnished to troops in field and camp. These rations were given out in the evening to be mixed with the tea. Fifteen to twenty men received one bottle. In times of great physical exertion, the allowance of sugar was increased.

Folly of Fashion

"So great was the weight of the elaborately padded garments worn by men in England during the reign of Henry the Eighth," points out Frederick Tisdale in an article in Liberty. "That a bench was built along the house of parliament so the fainting ladies could rest their untrussed thighs."

Ancient Tombs

Tombs that have been assigned to the Neolithic period which marks the transition from the Stone age to the Age of Bronze, have been discovered in Palestine. Some articles resemble those of modern times.

Voice of a Snake

Besides the little hiss that seems to be common with most snakes they are generally incompetent to make any else. There is one snake, however, the big water python or uncomin of Brazil, which gives a peculiar piercing cry at night.

Eph Snow

"After a man has made up his mind to be a prominent citizen, he seldom works much at anything else," thinks Eph Snow.

Making for Happiness

There is no happiness in having and getting, but only in giving; half the world is on the wrong scent in the pursuit of happiness.—Henry Drummond.

Why not make that house of yours more salable, more rentable or more livable for your family or for your present tenant by enclosing that open porch?

A glazed porch will be the brightest room in your home, enjoyed by all.

Call 207-M for a free estimate.

Sincerely,

Vincent B. Dupre

Jobbing and Contracting.

Credit Not Johnson's

When Doctor Johnson's "Rambler" was first published, the sale was decidedly disappointing. In fact the only paper, curious as it may seem in the light of his reputation today, which might be said to have been popular, was No. 37—the only one Doctor Johnson did not write. This paper, says the Market for Exchange, was said to have been written by Samuel Richardson.

Paine's Claim to Fame

Thomas Paine was born in 1737 and died in 1809. Of his work called "Common Sense" it is said that it was "the first open assertion of American independence, and was probably the most powerful pamphlet that ever influenced a nation's history." In this sense Thomas Paine may be said to have influenced the preparation and adoption of the Declaration of Independence.

Sizes of Continents

Europe forms only about one-fourteenth of the land surface of the globe. Asia extends over nearly one-third of the land surface of the globe. Africa has about three times the area of Europe. North America is a little less than twice the size of Europe; and South America is a little more than 1 1/2 times the size of Europe.
